## Coronavirus Disease – COVID-19 02.06.2020

- The death toll from the coronavirus outbreak is over 379,500 worldwide, with the highest number of deaths in USA (107,370) and UK (39,369). There have been more than 6,427,900 global cases in 210 countries and territories.
- The WHO has raised alarm about the risk of using antibiotics to treat Covid-19, fueling a rise in antimicrobial resistance around the world. The overuse of antibiotics, or using them unnecessarily, can lead to harmful antimicrobial resistance. WHO noted in a news release on Monday that new global data shows that bacterial infections across nations already are increasingly resistant to the medications used to the treat them -- and warned that the use of antibiotics during the coronavirus pandemic could drive this trend even more. "The Covid-19 pandemic has led to an increased use of antibiotics, which ultimately will lead to higher bacterial resistance rates that will impact the burden of disease and deaths during the pandemic and beyond," WHO Director General Dr. Tedros Adhanom Ghebreyesus said during a media briefing in Geneva.
- The WHO last week released clinical guidance for doctors not to use antibiotic therapy or prophylaxis among patients with mild or moderate Covid-19 unless there is a clear clinical indication to do so. "In the current Clinical Management of COVID-19, Interim Guidance, WHO has outlined the appropriate use of antibiotic therapy for medical professionals to treat patients. Therefore, both tackling antimicrobial resistance, while also saving lives," Tedros said. Tedros added that "record number" of countries are continuing to monitor and report cases of antimicrobial resistance, "as we gather more evidence, it's clear that the world is losing ability to use critically important antimicrobial medicines."
- Owing to the positive evolution of the coronavirus in Switzerland, many of the unprecedented lockdown measures have been relaxed, including the easing of some border restrictions. As part of further easing, on May 27 the Federal Council (executive body) announced that it aims to restore free movement of people with other European Schengen zone member countries by July 6. Swiss Justice Minister Karin Keller-Sutter said it is not yet possible to allow travel from outside the Schengen zone. The government also reaffirmed plans with France, Germany and Austria to lift all travel restrictions among the four countries on June 15. But it has told southern neighbour Italy that lifting border controls from June 3, a decision announced by Italy, is premature. Currently only cross-border workers can cross into Switzerland from Italy.
- Italy has introduced mandatory temperature checks for rail passengers in an effort to contain the spread of coronavirus, the country's Transport Ministry said in a statement today. "In all high speed stations, dedicated entrances are introduced for passengers on high-speed trains and Intercity trains to measure body temperature before boarding. If a body temperature higher than 37.5° C is detected, access on board the train will not be allowed," the statement said.
- The World Health Organization says 133 potential Covid-19 vaccines are in development around the
  world, according to documents posted on the organization's website. Ten of the potential vaccines are
  in clinical trials in the United States, the UK and China. The other 123 are in pre-clinical evaluation
  around the world, according to the WHO.

- Wuhan's Health Commission announced Tuesday that it had completed coronavirus tests on 9.9 million of its residents with no new confirmed cases found. "From May 14 to the end of June 1, 9,899,828 people in Wuhan have received nucleic acid tests," Lu Zuxun, of the Chinese Preventive Medicine Association, said at a news conference. Lu said no new cases had been found as a result of the city-wide testing, but 300 asymptomatic infections were discovered. China does not count asymptomatic cases as confirmed cases.
- With only one active case of novel coronavirus nationwide and none reported over the past 11 days,
   New Zealand's government is poised to ease coronavirus restrictions as soon as next week. Thailand,
   India and Mexico are among nations relaxing coronavirus restrictions.
- Iran has recorded more than 3,000 new cases of coronavirus in the past 24 hours, the highest in two months, the Ministry of Health's spokesperson said today.
- Health officials in Hong Kong have extended a ban on group gatherings of more than eight people for another two weeks following the discovery of several new locally transmitted coronavirus cases.
