## Coronavirus Disease – COVID-19 09.04.2020

- The death toll from the coronavirus outbreak is over 90,000 worldwide, with the highest number of deaths in Italy (17,669) and Spain (15,238). There have been more than 1,541,000 global cases in 211 countries.
- Some African countries could see a peak in coronavirus cases in the coming weeks, and testing should be urgently increased in the region, World Health Organization (WHO) officials said today. "During the last four days we can see that the numbers have already doubled. If the trend continues, and also learning from what happened in China and in Europe, some countries may face a huge peak very soon", said the WHO Africa programme manager Michel Yao.
- "For the past 100 days, our unwavering commitment has been to serve all people of the world with equity, objectivity and neutrality. That will continue to be our sole focus in the days, weeks and months ahead", tweeted Dr. Tedros Adhanom Ghebreyesus.
- The WHO's Africa head, Matshidiso Moeti, said there was an "urgent need" to expand testing capacity beyond capital cities in Africa, as the virus spreads through countries.
- The Swiss government is examining plans to stave off bankruptcies of companies struggling with the fallout of the coronavirus crisis. But regular debt collection procedures will resume on April 20.
- Health authorities in Singapore today reported an increase of 287 confirmed cases of coronavirus, double the increase registered a day earlier, with the majority linked to dormitories used to house foreign workers. Singapore's strict surveillance and quarantine regime initially slowed the outbreak, but recent rises in locally transmitted cases have raised fresh concerns.
- All trains, train stations, buses, bus stops and interchanges in Singapore will be progressively marked
  with safe distancing stickers, the Land Transport Authority (LTA) said today, the third day of heightened
  measures to combat the Covid-19 outbreak. Standing spaces and seats that should be avoided will be
  marked out. "Commuters should adhere to the spaces that are demarcated to maintain safe distances
  from others when commuting," the LTA said.
- The number of people killed by the coronavirus in Spain passed 15,000 on Thursday, but the daily death toll fell to 683 after two consecutive days of rising above 740.
- Spain's Prime Minister Pedro Sanchez expects to extend the country's state of emergency into May to help contain the spread of the novel coronavirus. "I am convinced that in 15 days we will have to do it because we won't have put an end to the pandemic," he said.
- Germany's army is donating 60 mobile ventilators free of charge to the UK following a call for help as the NHS scrambles to get hold of enough life-saving equipment as the Covid-19 pandemic intensifies.
- Germany has seen some positive developments over the last few days and is ready to "gradually return
  to normalcy" after Easter if current restriction measures are adhered to over the holidays, Germany's
  Health Minister Jens Spahn said.
- At least 100 doctors have died from coronavirus in Italy, the Italian Association of Doctors said Thursday.
   Eighty of them worked in the north of Italy, the hardest-hit area of the country. As of Wednesday,
   13,522 health workers have been infected in Italy, according to the Italian Institute of Health.

- The Finnish government extended restrictions on schools, museums and theaters to contain the spread of coronavirus until May 13, announced in a statement on Thursday.
- Chinese companies have signed medical supply contracts with 58 countries and regions, as well as four international bodies, as authorities around the world scramble to secure essential equipment.
- The pandemic will turn global economic growth "sharply negative" in 2020, triggering the worst fallout since the 1930s Great Depression, with only a partial recovery seen in 2021, the head of the International Monetary Fund (IMF) has said.
- It doesn't look like coronavirus will go away once the weather warms up, a prestigious scientific panel told the White House. "There is some evidence to suggest that [coronavirus] may transmit less efficiently in environments with higher ambient temperature and humidity; however, given the lack of host immunity globally, this reduction in transmission efficiency may not lead to a significant reduction in disease spread without the concomitant adoption of major public health interventions," according to the National Academy of Sciences committee.
