

Coronavirus

11.02.2020

- The coronavirus outbreak has killed more than 1,010 people and infected more than 43,000 globally, as it continues to spread beyond China.
- 108 people in mainland China died on Monday, the biggest single-day death toll yet.
- Experts from the World Health Organization (WHO) arrived in China today to assist with controlling the Wuhan coronavirus outbreak, after the death toll topped 1,000.
- The new coronavirus has been named **Covid-19** by Tedros Adhanom Ghebreyesus, the director general of the WHO. In addition, he said the virus poses “a very great threat”.
- The first coronavirus vaccine could be available in 18 months, “so we have to do everything today using available weapons”, the WHO chief, said in Geneva. Also, he said that there is a “realistic chance” of stopping the coronavirus.
- Chinese officials say most of the *cluster cases* they have observed from a study within families.
- Hong Kong confirms 7 additional cases of coronavirus, bringing total to 49. Authorities in Hong Kong are investigating whether two residents on different floors of the same building may have contracted the coronavirus from fecal matter due to a possible design flaw in the building's piping. The building is partially evacuated.
- A 2-year-old girl has been diagnosed with coronavirus in Singapore. In addition, a 37-year-old Singaporean with “no recent travel history to China”, was also confirmed to have the virus.
- China is struggling to return to work after the coronavirus outbreak shut down large swaths of the world's second biggest economy for more than two weeks. Worker shortages, transport disruption, a lack of medical supplies and heavy-handed local officials are all making life difficult for businesses, the Chinese government said Tuesday.
- A Holland America cruise ship with more than 2,200 people aboard was denied entry to at least five countries, despite no signs of illness.
- South Korea's Health Ministry has warned its citizens against traveling to six Asian nations, including Japan, Singapore, Taiwan, Thailand, Malaysia, and Vietnam, due to fears over the coronavirus. Citizens are recommended to minimize traveling to those countries to prevent bringing back novel coronavirus to South Korea
- In the UK, two newly infected people are health workers. Officials are "working urgently to identify all patients and other healthcare workers who may have come into close contact" with them.
- One of the people evacuated to the United States from Wuhan last week is infected with the coronavirus.
- Federal Reserve chairman Jerome Powell today warned Congress that the coronavirus could hurt the global economy.
- Coronavirus could wreck the global auto industry.

Countries	Cases	Deaths	Recovered
Mainland China	42,638	1,016	4,286
