Coronavirus Disease – COVID-19 24.03.2020

- The death toll from the coronavirus outbreak is over 17,260 worldwide, with the vast majority in Italy (6,820) and China (3,270). There have been more than 398,000 global cases in 197 countries.
- The WHO has warned that the pandemic is accelerating, with more than 300,000 cases now confirmed. It is urging countries to adopt rigorous testing and contact-tracing strategies.
- The WHO has also warned the US has the potential to become the global epicenter of the coronavirus outbreak. Speaking in Geneva, WHO spokeswoman Margaret Harris said there had been a "very large acceleration" in cases in the country. "We cannot say that is the case yet but it does have that potential" to become the next Covid-19 hotspot, she told reporters, according to Reuters. So far, there have been more than 46,000 cases in the US and 593 deaths, according to data collated by Johns Hopkins University.
- The lockdown in Wuhan, the Chinese city where the global coronavirus outbreak began, will be partially lifted on 8 April, officials say. Travel restrictions in the rest of Hubei province will be lifted from midnight on Tuesday for residents who are healthy. A single new case of the virus was reported in Wuhan on Tuesday following almost a week of no reported new cases.
- The World Health Organization (WHO) says about 3.4% of all cases have resulted in deaths, but scientists estimate that the death rate is actually much lower because many cases have mild symptoms and are not reported. The rate of fatalities also depends on a range of factors including age, sex, pre-existing conditions and the health system you are in. From the evidence available, we know that some groups of people are more likely to die if they contract the virus the elderly, the unwell and, maybe, men.
- Researchers in four countries will soon start a clinical trial of an unorthodox approach to the new coronavirus. They will test whether a century-old vaccine against tuberculosis (TB), a bacterial disease, can rev up the human immune system in a broad way, allowing it to better fight the virus that causes coronavirus disease 2019 and, perhaps, prevent infection with it altogether.
- The City of Los Angeles has introduced limited COVID-19 testing for certain high-risk individuals. Current individuals eligible for testing are people 65 or older, people with underlying chronic health conditions, people who have been exposed to a confirmed case of COVID-19.
- Even when the world is trying to find a cure for the dreaded coronavirus pandemic, a report in Global Times said that a man from China's Yunnan province died from *Hantavirus* while on a bus to the Shandong province. All the fellow passengers on the bus have been tested for the virus. The Centre for Disease Control says that the virus is spread mainly from rodents. It goes on to say that infection with any of the hantavirus can cause hantavirus disease in people.
- Indian PM Narendra Modi has just announced the most wide-ranging lockdown the world has seen yet with some 1.3 billion people affected. Here are the key points of his address: The lockdown will be
 "absolute" and in force for 21 days, no citizen will be allowed to leave their homes during this period. Mr
 Modi said it was the only way to break the cycle of the virus and that if the country could not manage
 the next 21 days, it would be set back by 21 years.

- With more countries shutting borders, export restrictions in India and manufacturing disruptions in China, there are growing concerns about the future of antibiotics a key line of defense against hospital infections.
- The UK is getting to grips with sweeping new measures to tackle the spread of coronavirus, including a ban on public gatherings of more than two people and the immediate closure of shops selling non-essential goods.
- Saudi Arabia has confirmed its first death from Covid-19. The victim was a 51-year-old man from Afghanistan, the health ministry says.
- The Olympics, due to begin in July, are moved to next year.
- 514 more people die in Spain, the worst day yet.
- A person who tested positive for the corona virus died on Tuesday. It is the first death in the canton of Thurgau.
- The Matterhorn is illuminated as a sign of hope. On behalf of Zermatt, the light artist Gerry Hofstetter will illuminate the Matterhorn daily between sunset and 11:00 p.m. from Tuesday as a sign of hope and solidarity in the Corona crisis.

Funding opportunities for researchers

The Innovative Medicines Initiative (IMI) - Call Open on Therapeutics and Diagnostics Combatting Coronavirus Infection
