Coronavirus Disease – COVID-19 27.03.2020

- The death toll from the coronavirus outbreak is over 25,200 worldwide, with the vast majority in Italy (8,215) and Spain (4,858). There have been more than 559,330 global cases in 200 countries.
- The US now has the most known cases worldwide, surpassing China and Italy.
- "To slow the spread of Covid-19, many countries introduced "lockdown" measures. Asking people to stay at home and shutting down population movement is buying time and reducing pressure on health system. But on their own, these measures will not extinguish epidemics. Aggressive measures to find, isolate, test, treat and trace are not only the best and fastest way out of extreme social and economic restrictions, they are also the best way to prevent them. We call on all countries to use this time to attack the coronavirus." said Director-General Dr.Tedros Adhanom Ghebreyesus during a published video.
- Italy has not reached the peak of coronavirus contagion, director of Italy's National Health Institute Silvio Brusaferro said today during a press conference. Brusaferro said that Italy "has not reached the peak [of contagion], we have signs that the curve is slowing down which make us assume that we are close to this. We expect that we could reach the peak these coming days. We are not in a descending phase, but the growth is slowing down". "We must not delude ourselves that a slowdown of the spread may lead us to slow down the measures of social distancing that we have adopted," Brusaferro added.
- The who is launching an official app for iOS and Android that is being designed to combat the spread of misinformation about COVID-19. The WHO MyHealth app is set to be launched on Monday and is being developed by a team of volunteer experts called the WHO Covid App Collective.
- In Germany, just 0.6% of their confirmed coronavirus cases have so far ended up being fatal the lowest figure amongst any of the most affected countries.
- A study by the Lombardy Region, co-authored by Professor Alessia Melegaro, (Bocconi's Dondena Center), provided the first description of the COVID-19 outbreak in Lombardy and made available the basic epidemiological parameters of the virus. The authors point out that in 47% of the symptomatic cases hospitalization was necessary and that intensive care was necessary for 18% of those hospitalized. The infection seems to be more frequent in the male population (62% of positive cases) and the median age of these first cases was 69 years.
- UK Prime Minister Boris Johnson tested positive for Covid-19.
- US epidemiologist: "I do not know what the national plan is" on coronavirus. An infectious disease epidemiologist says there is still confusion over a concerted national plan for responding to the coronavirus. "We still don't have a plan. I do not know what the national plan is for responding to this virus. Until we get that, it is a piecemeal situation," said Dr. Michael Osterholm, director of the Center for Infectious Disease Research and Policy at the University of Minnesota.
- Forty-five doctors who tested positive for coronavirus have died in Italy, the Italian Association of Doctors said today. Since the beginning of the epidemic, more than 6,000 health workers have been infected by coronavirus as of Thursday, according to the Italian National Institute of Health.

- A Chinese government regulatory group said on Friday it has launched an investigation into Covid-19 test kit maker which supplied test kits to Spain that were recalled. dOn Thursday, the Spanish government said it was recalling 9,000 kits after finding the results to be "unreliable." Health officials in Hong Kong have confirmed 65 new novel coronavirus cases, in the largest single-day increase since the outbreak began.
- The European Space Agency published new images showing sharp reductions in pollution over several major cities in Europe due to the coronavirus crisis. The data is based on observations by the Copernicus SentineI-5P satellite, and show dramatic declines in the levels of nitrogen dioxide concentrations over Paris, Milan and Rome, compared to average concentrations a year ago.
- China is closing its border to foreigners amid fears of imported novel coronavirus cases causing a second outbreak in the country where the infection was first detected.
- South Africa reported its first two coronavirus deaths and over 1,000 cases Friday, as the country begins a 21-day lockdown. Soldiers and police are out on patrol in Johannesburg and telling the city's homeless that they will be transported to designated shelters.
